NUMBER 16

STEAMER TITANIC SINKS

Strikes Iceberg Last Sunday Night and Sinks at 2:20 Monday Morning.

About 1,300 Are Lost—Many Prominent in Various Walks of Life Believed to Have Perished.

The most appalling marine disaster in the world's history took place early last Monday morning off Cape Race, when the Steamer Titanic struck an iceberg and was damaged so badly that it sank at about 2:20 a. m., and before sufficient relief could reach her to save the passengers. The women and children and a few of the men were put off in life boats and were picked up by the Steamer Carpathia several hours after the Titanic had sunk. The Steamers Virginian, Parisian and Californian also went to the relief of the Titanic but evidently arrived too late to be of any assistance.

Reports have been received that the Carpathia picked up about 850 of the passengers of the Titanic, mostly women and children.

Some very notable people were on board the Titanic and at the present writing are supposed to have lost their lives, as follows: C. M. Hays, president of the Grand Trunk Pacific; John Jacob Astor, Benjamin Guggenheim, Isidor Straus, Maj. Archibald Batts, military aide to President Taft; W. T. Stead, J. B. Thayer, vice president of the Pennsylvania railway; Col. Washington Roehling, builder of the Brooklyn bridge, and many other prominent people of Europe and America.

The number of lives lost is between 1,300 and 1,400, probably all men.

No Survivors on the Virginian or Parisian.

A wireless message from Captain Haddock, of the Steamer ship Olympic, Tuesday night, reads as follows:

"Please allow rumors the Virginian has any of the Titanic passengers. Neither the Parisian, I believe that the only survivors are on the Carpathia. The second, third, fourth and fifth officers and the second Marconi operator are the only officers reported saved."

Nothing could show more plainly the heroism of the crew and the men passengers who stood by the doomed ship, facing practically sure death, and sent the women and children away in the life boats. Some had to be left. Hundreds, in fact, were left. But to all appearances the men who were left stayed behind deliberately, calmly stepping aside to let the weaker ones, those to whom they owed protection, make their way to safety.

The following Canadians were on the Titanic and those lost and saved were: Lost—Charles M. Hays, Montreal; Hugo Ross, Winnipeg; J. Borebank, Winnipeg; George E. Graham, buyer for Eaton, Winnipeg; Thompson Beattie, Winnipeg; Dr. Alfred Paine, Hamilton; Mark Fortune, Winnipeg; J. Allison, Montreal; Mrs. Allison and son, Montreal; J. Baxter, Montreal; Thornton Davidson, Montreal; V. Payne, M. W. H. Parr, Montreal; George Wright, Halifax; Ernest A. Sjostedt, Sault Ste. James; McCrie, Sault Ste. James.

Saved—Mrs. Chas. M. Hays, Montreal; Mrs. Thornton Davidson, Montreal; Mrs. John C. Hogeborn, Major Arthur Peuchen, Toronto; Mrs. Mark Fortune, Alice Fortune, Ethel Fortune, Mabel Fortune, Winnipeg; infant daughter of H. J. Allison and nurse, Montreal.

Holding Back Story.

The general opinion in New York is that Bruce Ismay, president of the White Star line, who is one of the survivors on board the Carpathia, is responsible for the holding back of the full story of the wreck. The New York Journal points the finger of scorn at him, but no other New York paper dares to say anything. All accept to be afraid that no story will come out until the survivors are landed.

All the latest reports confirm

the belief that all the notables whose names appear above, went down with the Titanic. There may be a few names added to the survivors' list when the Carpathia lands, which were left out of the first messages by mistake in transmission, but it is not likely that there will be very many. The survivors are expected to land today.

Three Officers Saved.

The White Star officials issued a statement Thursday

saying that the officers of the Titanic saved were second officer Laugholler, third officer Pitman and fourth officer Boxall.

Side Torn Out.

Alex. Gault, lately chief designer for Harland & Wolff and the designer of both the Titanic and Olympic, in the course of an interview last Tuesday said:

"When the news first came that the Titanic was sinking by the head I thought it likely that she would reach port. The fact that she sank within four hours after the impact with the ice indicates that her side was torn out.

"The apparent fact that the Titanic's boats were not sufficient to accommodate the ship's personnel is causing much comment in London, although the papers are chary of discussing on the subject.

BREVITIES

George Thompson purchased lots 5 and 6 in block 23, this week.

Thomas Sirr and family moved out to their farm last Monday.

Mr. and Mrs. J. L. Landis arrived in Redcliff last Saturday. They own considerable real estate here.

Miss Goldie Benjamin received word the first of the week of the death of her brother at his home, near Carlisle. She left Tuesday to attend the funeral.

John Watson has purchased lots 19 and 10, in block 28, from the town site owners.

Thos. P. R. O'Brien has fulfilled their promise by laying a sidewalk from the end of the village walk to the depot. This will be very convenient in wet weather.

The town site owners have announced that the price of lots will be advanced 50 per cent on next Monday, April 22. Saturday is the last day at the old prices.

George Patterson, who was operated on for appendicitis last week, is doing well, and will be up and around again in a couple of weeks.

Going Fast.

The Brick & Coal Company have shipped out about 40 cars of brick this week. The large stock made during the winter is going fast and it won't be long before they will be shipping fresh from the kilns.

Soon Completed.

The water main on the hill will be completed and the people now living there will soon be able to get their water without having to carry it three or four blocks, as at present.

A Baseball Meeting.

A meeting will be called soon for the organization of a Redcliff baseball club. It is the desire of those interested to combine the best players from both ends of town and then arrange for games with Carlisle, Sault Ste. Marie and other nearby towns. Redcliff has the making of a good team and ought to be able to organize one that could stand up anything they would have to go up against from the surrounding towns.

Will Sail for England.

OTAWA, April 18.—Premier Borden, Hon. J. D. Hearn and Hon. Sam Hughes will sail for England at the end of May. They will confer with the admiralty regarding Canada's naval plans and with the war office in reference to military cooperation.

AWARD CONTRACT

Medicine Hat Firm the Successful Bidders on New Foundry Building.

The contract for the foundry building of the Alberta-American Ornamental Iron Works was let last Tuesday to the Lawlor Construction Company, of Medicine Hat. Work will begin at once on its construction and will be rushed to completion. The building is to be of brick, with a metal roof and will be 45x113 feet in size. It will cost \$8,000.

STANDING OF PUPILS

The following marks were obtained by the pupils of grades five and eight during the past week:

| GRADE FIVE. | Canadian Hist. |
|------------------|------------------------|
| Hazel Current | 97 |
| Clara Clark | 97 |
| Ralph Clark | 72 |
| Marjorie Miller | 44 |
| Evelyn Ridd | 44 |
| Rosa McKay | 9 |
| GRADE EIGHT. | Spelling. |
| Edythe Broadfoot | 95 |
| Viola Gibson | 91 |
| R. K. Coulter, | Principal and Teacher. |

The Ladies Aid Supper

The supper given by the Ladies' Aid of the Redcliff church, at the residence of Mrs. C. W. White, was a very successful affair and a very nice supper was served by the ladies.

REDCIFF IS CROWDED

Redcliff has been crowded for the past 10 days and it has been impossible to get a bed. More are coming every day but cannot go to the Medicine Hat for the night. Some thought should be done very soon to provide living quarters for those desiring to locate here in the shape of residences and boarding houses.

RECEIVES BIG MAJORITY

TORONTO, Ont., April 17.—The Methodist vote to date, compiled today on church union between the Presbyterian, Congregational and Methodist churches, show that 80 per cent of the total vote is in favor of union. The same percentage exists for union in the membership vote, the official vote and that of the synods. The quarterly officials' board of votes have voted almost 90 per cent in favor of the union church.

Freight Wreck on the C. P. R.

A freight wreck on the C. P. R. about eight miles west of Redcliff occurred Wednesday about supper time. Several cars of lumber and other freight left the track. Traffic was suspended for 10 hours. No one hurt.

Steamer Earl Grey on Rocks

PICTON, N.S., April 17.—The government steamer Earl Grey from Charlottetown in Picton west today at 10:30 this morning, between Tony river and Cape John, according to wireless sent here from the Grey.

The Minto from Picton to Charlottetown, which was anchored off Charlottetown harbor is a few miles T. & N. harbor to the Grey's assistance, the fog having risen.

A wireless received from the Grey at 11:30 says she is ashore two miles west of Tony river on a rocky bottom, making no water.

"INTERVIEW AT ONCE"

Gen. Loannard Wood Advocates the Invasion of Mexico by United States.

WASHINGTON, April 18.—With the arrival of former President De la Barra, friend of the old Diaz regime in Mexico, Major-General Loannard Wood has advised President Taft to intervene in Mexico without delay.

General Wood is in possession of all information submitted to the war department by its secret agent in Mexico and he is well aware of the alarming fact that the situation in that fortunate country is steadily growing worse.

In spite of consulting moderation and obedience to the law in Mexico, it is well known that De la Barra is the personal friend of the immensely rich coterie which is providing the sinews of war for the revolutionists and that he is stated by it for president when Mexico is overthrown.

Not the smallest detail is expressed in Washington that the presence of De la Barra in Mexico City will stir the insurgents to even more determined efforts to wrest the reins of government from the party now in power.

Alarming reports on the growing state of anarchy throughout the central and southern sections of Mexico, particularly in the states of Vera Cruz, Chiapas and Morelos, were received by the state department. Zapata is enlisting recruits by the hundreds in those three states.

Asquith, where many American men are business, is practically cut off from the outside world through the surreptitious activity and the interruption of railway traffic. The small city of Iloilo, in the state of Durango, is the same unfortunate situation.

HURT IN A RUNAWAY

Robert Hamilton and Family and Mrs. A. J. Learmonth are badly injured.

Robert Hamilton and family and Mrs. A. J. Learmonth were badly bruised and shaken up in a runaway last Monday afternoon. They had driven to Medicine Hat to do some trading and were on their way home, when Mr. Hamilton, who was driving, dropped one of the lines, and endeavoring to stop the team to regain it, started the horses going around in a circle and tipped the rig, throwing them all out. Mrs. Learmonth had her right wrist broken and received several bad bruises.

Mrs. Hamilton was rendered unconscious for some time but aside from some bad bruises, was not otherwise hurt. Mr. Hamilton and his little daughter were also badly shaken up and bruised, but Mr. Hamilton's little boy was uninjured.

Shortly after the accident occurred Mr. E. C. Daniels happened along with his machine and assisted them to their homes in this city. Dr. Brown was called, who dressed their injuries.

The horses and rig were found the next day at the experimental farm.

UNLOADING THEIR MACHINERY

The Alberta-American Ornamental Iron Works are busy unloading their machinery and getting it into place. One car was unloaded last Saturday, and four more cars arrived this morning, which is being unloaded today. The new plant is a very busy place these days and they expect to be manufacturing ornamental iron by the middle of next month.

Banquet for Mr. Woodcock

The employees of the Redcliff Brick & Coal Company will banquet Mr. A. W. Woodcock a tender at the Redcliff Hotel tonight, a full account of which will appear in our next issue.

WHAT TO SAY ABOUT REDCLIFF

Redcliff is situated on the main line of the C. P. R., 173 miles east of Calgary, on the banks of the Saskatchewan river.

Natural gas is probably Redcliff's first and greatest asset—meeting the requirements of as great a demand as may be made for manufacturing purposes.

Working coal mines on both sides of the river, and immense deposits cropping out yet unexplored.

Brick and other clay products are manufactured, extensively and additional enterprises for this line of industry are in contemplation.

The business houses and residences are practically all of brick—home products.

Silica sands abound, tests of which have proven an excellent quality for glass making.

Industrial sites are donated to new enterprises.

Surrounding territory is in the heart of Alberta's wheat belt and there are no more prosperous farmers in the world than here.

REDCIFF ALREADY HAS

A flour mill that will grind 75,000 bushels of wheat per month or 500,000 bushels per year.

A well equipped foundry, machine shop and planing mill in operation.

Two plants for making brick and clay products, the demand for which is increasing constantly.

One protestant church.

A fine, new, thoroughly modern brick school house.

An excellent gas lighting system, and mains laid throughout the city.

An assessed valuation of more than half a million and a municipal tax rate of eight mills.

As fine a three-story modern brick hotel as there is in the west.

A perfect system of water works—water pure as the mountain springs.

All this has been accomplished in two years time.

THE ROOSEVELT DAM.

One of the Remarkable Engineering

Feats of the Age.

The Roosevelt dam, in Arizona,

the most important structure yet

constructed by the reclamation

service, was formally dedicated on the

15th of November, 1911, by former President

Woodrow Wilson. The presence of

the president territorial officers, the

governor and members of the

legislature from all parts of the southwest.

This dam is one of the most im-

pressive structures in the world,

and its construction is one of the

greatest engineering feats of the age.

From foundation rock to top of parapet

walls it is 264 feet high, in length

over 1,000 feet, and its concrete

contents are 120,000 yards. Its base

covers approximately six acres of

ground. The first stone was laid on

Sept. 20, 1906, and the structure was

fully completed on Feb. 8, 1911.

The Roosevelt dam serves a dual

purpose—first as a conservator of floods

and, second, to develop power. The

storage reservoir created by the dam is

one of the largest artificial bodies

of water in the world. Spread out

at its base, it would more than cover

the entire area of Delaware.

With the water supply now guaran-

teed, the Roosevelt dam will supply

by a quarter of a million acre feet

more in irrigation. The annual

flow of the Colorado river at the

mouth of the dam is estimated at

about 10,000,000 acre feet. The dam

will conserve the water and de-

veloped will be greater than the en-

tire of the Colorado river at the

mouth of the dam is estimated at

about 10,000,000 acre feet. The dam

Synopsis of Canadian Northwest Land Regulations

Any person who is the sole head of a family or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$2.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$2.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$500.00.

Coal—Coal mining rights may be leased for a period of twenty-one years renewable at an annual rental of \$1 per acre, not more than 2,500 acres shall be issued to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

FRIDAY, APRIL 10, 1912

CHIVALRY STILL ALIVE.

The reports which have been received of the great sea disaster, show that the great majority of the men on board the Titanic stood aside and allowed the women and children to be saved, which shows that chivalry is not dead. Men prominent in literature, art, science, wealth and other walks of life allowed the most humble of the women to be saved, while they went down with the ship. Could there be any greater display of chivalry on the part of men than that?

We have heard a great deal of talk in late years that chivalry on the part of men was on the wane but this great disaster goes a long way to disprove such assertions.

REDCLIFF BACHELORS.

Mr. H. A. Ireland is taking regular Sunday drives out into the country. Wonder what the attraction is out on the prairies?

Mr. Cecil Hall spends his Sundays in Medicine Hat. Now there is only one thing that could induce a real live one to spend his spare time in that town. He should get busy and have the attraction moved to Redcliff.

Mr. James Merry says he is so pleased with his new house that he will never get married. Don't be too sure, Jim. Remember what the spider said to the fly.

Mr. Edward Daniels is furnishing up some very fine bachelor quarters. Better build a nice house, Ed., and ask some nice young lady to share it with you.

Now there is Mr. Sampson, of the Imperial bank. All the ladies like bankers.

It has been hinted about town lately that one of our south town bachelors will soon forsake his brethren. How about that, J. L.

Oh, no. The proprietor of the REVIEW is beyond redemption. Anyway, newspaper men don't take with the ladies. They are too serious.

Joe Tarrent is still a bachelor, although we were afraid that he intended to forsake us when he went on that eastern trip last month.

Installing Machinery

The Redcliff Mill & Elevator Company are installing their new machinery which arrived last week. Their new office building is finished and work on their new warehouse will be commenced shortly, and after its completion the elevator will be constructed.

A Social and Dance.

A social and dance will be given by the Sons of England at Maple Hall, Tuesday night, April 23rd. Admission will be \$1.

Redcliff the Gas City
